about dea design

DEA DESIGN has been producing solid surface bathtubs and sinks since 2007, mainly exporting to European and North American markets. We have built a high reputation for our consistent outstanding quality and good service with CE and ICC-ES certificates.

Компания DEA DESIGN производит ванны и раковины из искусственного камня с 2007 года, в основном экспортируя их на рынки Европы и Северной Америки. Мы заслужили высокую репутацию благодаря нашему неизменно выдающемуся качеству и хорошему обслуживанию с сертификатами CE и ICC-ES.

“The bathroom
as a dynamic and
stylish living space
that constantly
transforms with
your home”

как динамичное
и стильное жилое
пространство,
которое постоянно
трансформируется
вместе с вашим
ДОМОМ»

solid surface product overview

PRODUCT DESCRIPTION

Basic use

Solid Surface is an advanced composite product used as an architectural and design material in a variety of residential and commercial applications. Solid Surface offers design versatility, functionality and durability. It is the original Solid Surface material made only by DuPont. It is widely accepted as a material for countertops, bathtub, shower tray, kitchen sinks, vanity basins and other in numerous markets including lodging, healthcare, banks, boutiques, restaurants.

Composition

Solid Surface is a solid, nonporous, homogeneous surfacing material, composed of 1/3 acrylic resin (also known as polymethyl methacrylate or PMMA), and 2/3 natural minerals. These minerals are composed of aluminum trihydrate (ATH) derived from bauxite, an ore from which aluminum is extracted. Solid Surface sinks and lavatories utilize a acrylic-modified polyester resin. For more information on the composition of the material, please consult the Solid Surface Safety Data Sheets (SDS) available via the dupont.com website or via your local supplier.

Colors of Solid Surface

A broad palette of colors allows for an almost unlimited working palette. You can choose a single color; a classic basis for design; or experiment with eye-catching harmonics. Solid Surface can also be used as inlays, accents, or as a versatile complement to other materials like metal, wood, stone, etc. For complete information on colors, refer to samples. Hues are related by style and character. Dark, heavily pigmented colors will show scratches, dast and ordinary wear and tear more readily than lighter, textured colors. As a result, these colors are recommended for applications where surface contact is light or for use as inlays and accent colors. However, the series with deept colors incorporates an innovative, proprietary technology that delivers greater depth of color and increased durability compared to other dark colors.

Sealants and Adhesives

Solid Surface is compatible with many commercially available caulks and sealants. 100% silicone products are recommended. For making seams in countertops, repairs and custom edges, color coordinated Corian® Joint Adhesive should be used. When used in accordance with manufacturer's instructions, it provides a smooth and inconspicuous joint. Corian® Joint Adhesive is available from Corian® Design or its distributors.

MAINTENANCE

Preventing Damage to Solid Surface

Avoid prolonged exposure to strong chemicals such as acids, bases, and organic solvents. Spills should be cleaned up promptly. Refer to Corian Chemical Resistance (K-27406) for additional details regarding chemical exposures, and Corian Solid Surface Care and Maintenance for Facility Managers (K-29810) for clean up, and general maintenance. In case of exposure outside the specifications listed in the Class I Reagents section, the 10-year limited product warranty will be void and handled as a case of abuse. While unaffected by minor impacts, Solid Surface can be damaged by heavy impacts, especially from pointed objects. It can also be damaged by excessive heat.

Repairing Solid Surface

Solid Surface provides superior value by being inconspicuously repairable in most cases. Minor cuts, scratches, and stains can be removed by owners using fine sandpaper and Scotch-Brite pads. Deeper cuts or impact damage such as cracks may require an authorized fabricator/installer to make inconspicuous repairs.

ADDITIONAL INFORMATION

обзор продукции solid surface

ОПИСАНИЕ ПРОДУКТА

Основное применение

Solid Surface — это передовой композитный продукт, используемый в качестве архитектурного и дизайнерского материала в различных жилых и коммерческих помещениях. Solid Surface предлагает универсальность дизайна, функциональность и долговечность. Это оригинальный материал Solid Surface, производимый только компанией DuPont. Он широко применяется в качестве материала для столешниц, ванн, душевых поддонов, кухонных моек, раковин и других изделий на многочисленных площадках, включая жилье, здравоохранение, банки, бутики, рестораны.

Состав

Solid Surface — это твердый, непористый, однородный поверхностный материал, состоящий на 1/3 из акриловой смолы (также известной как полиметилметакрилат или PMMA) и на 2/3 из природных минералов. Эти минералы состоят из тригидрата алюминия (ATH), полученного из боксита, руды, из которой добывают алюминий. Раковины и ванны Solid Surface используют модифицированную акрилом полиэфирную смолу. Для получения дополнительной информации о составе материала, пожалуйста, ознакомьтесь с паспортами безопасности Solid Surface (SDS), доступными на веб-сайте dupont.com или у вашего местного поставщика.

Цвета Solid Surface

Широкая палитра цветов позволяет использовать практически неограниченную рабочую палитру. Вы можете выбрать один цвет; классическую основу для дизайна; или поэкспериментировать с привлекательными для глаз оттенками. Solid Surface также можно использовать в качестве инкрустаций, подкладок или как универсальное дополнение к другим материалам, таким как металл, дерево, камень и т. д. Для получения полной информации о цветах см. образцы. Оттенки связаны по стилю и характеру. Темные, сильно пигментированные цвета будут демонстрировать царапины, пятна и обычный износ быстрее, чем более светлые, текстурированные цвета. В результате эти цвета рекомендуются для применений, где контакт с поверхностью легкий или для использования в качестве инкрустаций и акцентных цветов. Однако серия с более глубокими цветами включает в себя инновационную, запатентованную технологию, которая обеспечивает большую глубину цвета и повышенную долговечность по сравнению с другими темными цветами.

Герметики и клеи

Твердая поверхность совместима со многими имеющимися в продаже герметиками и герметиками. Рекомендуются 100% силиконовые продукты. Для создания швов на столешницах, ремонта и изготовления нестандартных кромок следует использовать цветной клей Corian® Joint Adhesive. При использовании в соответствии с инструкциями производителя он обеспечивает гладкий и незаметный шов. Клей Corian® Joint Adhesive можно приобрести в Corian® Design или у его дистрибьюторов.

ОБСЛУЖИВАНИЕ

Предотвращение повреждения твердой поверхности

Избегайте длительного воздействия сильных химикатов, таких как кислоты, основания и органические растворители. Разливы следует немедленно убирать. Дополнительные сведения о химическом воздействии см. в документе Corian Chemical Resistance (K-27406), а также в документе Corian Solid Surface Care and Maintenance for Facility Managers (K-29810) для очистки и общего обслуживания. В случае воздействия за пределами спецификаций, указанных в разделе «Реагенты класса I», 10-летняя ограниченная гарантия на изделие будет аннулирована и будет рассматриваться как случай неправильного обращения. Несмотря на то, что Solid Surface не подвержен незначительным ударам, он может быть поврежден сильными ударами, особенно острыми предметами. Он также может быть поврежден чрезмерным нагревом.

Ремонт твердой поверхности

Твердая поверхность обеспечивает превосходную ценность, будучи незаметной и поддающейся ремонту в большинстве случаев. Небольшие порезы, царапины и пятна могут быть удалены владельцами с помощью мелкой наждачной бумаги и губок Scotch-Brite. Более глубокие порезы или повреждения от ударов, такие как трещины, могут потребовать от авторизованного изготовителя/установщика выполнения незаметного ремонта.

ДОПОЛНИТЕЛЬНАЯ ИНФОРМАЦИЯ

Для получения дополнительной информации или поддержки свяжитесь с вашим местным дистрибьютором, посетите deadesign.it.

glasstech product overview

PRODUCT DESCRIPTION

The material has passed anti-corrosion tests (salt spray), demonstrated chemical and physical resistance to products such as: perfumes, toothpastes, mouthwashes, coffee.

Glasstech does not turn yellow and is suitable for indoor and outdoor use.

Is not subject to chromatic changes, even under the influence of natural and artificial light.

Due to its composition, Glasstech items weigh 30% less than Solid Surface products.

A composite, durable as stone and transparent as crystal, which is hand-poured into molds. Each product is unique, slight differences in color, size or small air bubbles that may form, animate and give authenticity to each product. Grinding and polishing of products is done by hand. Colored resin, transparent with a glossy finish, consisting of high-quality acrylic resins and coloring pigments.

CARE

Minor stains can be removed with a damp cloth using liquid household cleaning detergents.

If minor scratches have affected only the upper transparent protective layer, the following steps are applicable to their removal:

1. using fine-grained sandpaper (grain size 1500-3000).
2. processing with a polishing disc using abrasive paste

TOXICITY

The product is not toxic to humans, animals and the environment.

ECOLOGY

Dispose of only in accordance with the regulations in force in the territory of your country.

обзор продукции glasstech

ОПИСАНИЕ ПРОДУКТА

Материал прошел антикоррозионные испытания (солевой аэрозоль), продемонстрировал химическое и физическое сопротивление к таким продуктам, как: духи, зубные пасты, ополаскиватели для рта, кофе.

Glasstech не желтеет и подходит для внутреннего и наружного применения. Не подвержен хроматическим изменениям, даже под воздействием естественного и искусственного света.

Благодаря своему составу предметы из Glasstech весят на 30% меньше, чем изделия из Solid Surface.

Композит, стойкий как камень и прозрачный как кристалл, который вручную заливается в формы. Каждое изделие уникально, незначительные различия в цвете, размере или мелких пузырьках воздуха, которые могут образовываться, одушевляют и придают аутентичность каждому изделию. Шлифовка и полировка изделий происходит вручную.

Цветная смола, прозрачная с глянцевым покрытием, состоящая из высококачественных акриловых смол и красящих пигментов.

ОБСЛУЖИВАНИЕ

Небольшие загрязнения могут быть удалены влажной тканью с использованием жидких моющих средств для домашней уборки.

Если незначительные царапины затронули только верхний прозрачный защитный слой, то для их устранения применимы следующие шаги:

1. использование мелкозернистой наждачной бумаги (зернистость 1500-3000).
2. обработка полировальным диском с использованием абразивной пасты

ТОКСИЧНОСТЬ

Продукт не является токсичным для людей, животных и для окружающей среды.

ЭКОЛОГИЯ

Утилизировать только в соответствии с нормами, действующими на территории вашего государства.
